RAHUL MITTAL

Full Stack Developer & AI Engineer

Chandigarh, India · rahulmittal.768@gmail.com · rahul-mittal.vercel.app · linkedin.com/in/rahul-mittal-750a141a9 · github.com/rahulml768

Full stack developer and AI engineer. I've built ERP modules, healthcare compliance platforms and AI products like Canvas Client, Agentra and Agent 69. Focus: AI engineering, microservices and system design. Community Award winner at the 0G APAC Hackathon.

SKILLS

AI	AI engineering, Agentic AI, Context engineering, RAG, LangChain, AI agents in Python
LANGUAGES	JavaScript, TypeScript, Python, Apache Groovy, HTML, CSS
FRAMEWORKS	Node.js, Express.js, Next.js, React.js, .NET, Socket.io, jQuery, WordPress
BLOCKCHAIN	Solidity, Smart contracts, Ethereum, Ethers.js, Web3
ARCHITECTURE	Microservices, System design
CLOUD & DATA	AWS Lambda, AWS EC2, Cloudflare, MongoDB, SQL, Mongoose, Elasticsearch
TOOLS	GitHub, Postman, CI/CD pipelines

EXPERIENCE

Full Stack Developer · Nucleo Analytics
04/2026 – Present

Product team

- Built Canvas Client, a project management platform for agencies with 1,000+ users, and fixed its latency issues.
- Worked on Socilytix, a workspace for managing Meta ads and client reporting.

Full Stack Developer · Ultivic Pvt
07/2025 – 2026

Mohali, India · Web and mobile application development

- Developed and enforced role-based access control with granular permissions for secure, multi-level data access.
- Boosted backend search and retrieval with Elasticsearch, improving data query performance by over 15% across critical modules.

Full Stack Developer · Onfinity (formerly Vienna Advantage)
08/2023 – 07/2025

Mohali, India · ERP product, .NET and React.js

- Built four ERP modules from scratch (HRM, Service & Maintenance, Treasury & Finance, CRM), used across multiple countries including Kuwait and Oman.
- Service & Maintenance: real-time resource tracking, automated scheduling for task allocation and Google Maps API integration for live tracking.
- Improved server response time by 40% using optimized query algorithms.
- Improved backend processing time by 30% by optimizing database queries and server-side logic.
- Integrated third-party APIs into existing applications.

PROJECTS

Canvas Client · Agency project management
canvasclient.com

Built the entire platform at Nucleo Analytics: tasks, clients, team chat and reporting in one workspace for 1,000+ users. AI task creation generates subtasks, due dates and owners; workflow automation with reusable templates; reports on performance, profitability and growth.

Next.js · MUI · Firebase · Socket.io · Sentry · Microservices

Agentra (formerly Zavorik) · AI employees
agentra.live

AI employees organised into departments: a chief-of-staff agent routes a plain-language instruction to department directors, who break it into tasks for specialist agents. Emails, campaigns and spend wait for human approval. Connects to Gmail, Meta Ads, HubSpot, Salesforce and LinkedIn. Used by real users.

Agentic AI · Next.js · Microservices · Approval workflows · Integrations

Agent 69 (formerly Agentra) · On-chain AI agents agentra69.in

AI agents deployed as iNFTs that earn per call, each with a live MCP endpoint, metered billing and logs anchored to 0G Storage. I built the entire backend and some of the agents in Python; Mohit built the blockchain side and Daksh the frontend. **Community Award, 0G APAC Hackathon**: one of 23 winners from 293 submissions.

Python · Node.js · React · Solidity · Ethers · MCP · Context engineering

Two Girls Garage · Auto parts e-commerce 2girlsgarage.com

Built the store for a heavy-duty auto parts supplier, including product synchronization from supplier feeds over FTP and SFTP, and the Shippo (shipping), Authorize.Net (payments) and Vega integrations.

Next.js · E-commerce · FTP/SFTP · Shippo · Authorize.Net · Vega

Sagenik · Healthcare compliance sagenik.com

Integrated a multi-hospital healthcare ecosystem into one platform with end-to-end compliance workflows. Implemented role-based access control at user, department and enterprise level, and engineered the payment gateway for single-location and multi-location billing.

React · Node.js · Microservices · RBAC · Payment gateway

Proud Diaspo Face · Social network for immigrants prouddiaspoface.com

Built the web app and the backend queries for the app: global posts, consent-based private messaging, friend requests and communities.

Socilytix · Meta ads management socilytix.com

Workspace where a client connects their Meta account once and the team manages campaigns, ad sets, audiences, pixels and KPI reports from one place, with no credentials to hand over.

React · Recharts · Meta Ads integration

ACHIEVEMENTS

Community Award · 0G APAC Hackathon Agent 69 (then Agentra)

One of 23 winners from 293 submissions, with builders from 38 countries and regions.

EDUCATION

Bachelor of Technology · Chandigarh Group of Colleges, Mohali CGPA 7.2

Class XII · Aggarsain Public School, Kurukshetra 83%

Class X · CBSE CGPA 8.6

HOBBIES

Playing chess, reading books
